Aim:

S.No: 49

Write a program to merge two files and stores their contents in another file.

- Open a new file "SampleDataFile1.txt" in write mode
- · Write the content onto the file
- · Close the file
- Open another new file "SampleDataFile2.txt" in write mode
- Write the content onto the file
- · Close the file
- Open first existing file "SampleDataFile1.txt" in read mode
- Open a new file "SampleDataFile3.txt" in write mode
- Copy the content from first existing file to new file
- · Close the first existing file
- Open another existing file "(SampleDataFile2.txt)" in read mode
- Copy its content from existing file to new file
- · Close that existing file
- Close the merged file
